EXPERIENCE

MERN Stack Developer 2023-now
Freelance

Developed dynamic web applications using Next.js, React.js, Tailwind CSS, and Node.js. Integrated APIs, implemented MongoDB, and built responsive websites for various clients. Created an automated response system using React.js.

Frontend Developer 2021-2023
Freelance

Specialized in building responsive, interactive UIs with React.js, Tailwind CSS, and Three.js. Focused on delivering high-quality user experiences through efficient design and performance optimization

Game Developer 2020-2022
Freelance

Developed mobile games using Unity and C#, focusing on gameplay mechanics, performance optimization, and user-friendly interfaces for mobile platforms

PROJECTS

NovaDash eCommerce Admin Dashboard August-2024
https://nova-buy-e-commerce.vercel.app

Built a fully functional eCommerce admin dashboard using the MERN stack and Tailwind CSS. Designed and implemented a scalable architecture that allows for real-time updates and management of product inventory, sales, and customer data. Collaborated with backend developers to integrate a MongoDB database for seamless data flow.

Movie and Series Streaming Website September-2024
Freelance / client

Built a streaming website using Next.js, Prisma, Neon, Clerk, and Redux for managing movie data, user authentication, and state management.

eCommerce Platform & Admin Dashboard july-2024
https://fastcom-preview.netlify.app/

Developed dynamic, scalable web applications using MongoDB, Express.js, React.js, and Node.js. Built a robust eCommerce platform and a fully customizable admin dashboard with user-friendly interfaces designed with React.js and Tailwind CSS. The backend, powered by Node.js and Express.js, handles APIs and data management efficiently with MongoDB.
